SAYEF KHAN

Software Engineer

Ipswich

Technical Experience

Telstra (2023-2024)

Developed and maintained scalable software features within an agile team, collaborating with product owners and fellow engineers to deliver reliable customer-facing solutions. Wrote clean, tested code, participated in code reviews, resolved production issues, and contributed to continuous improvements in performance, quality, and delivery processes.

Roque (2025-2026)

Founder of Roque, delivering LLM and AI software services. Every project is handled end to end. Scoping client requirements, architectural planning, user experience designing. Building and integrating AI models, software & websites, quality & security testing. Ongoing live support after deliverables.

Managerial Experience

Guzman y Gomez (2024-2026)

Assistant Manager

Led restaurant operations, supervising and training team members, managing rosters and stock, and maintaining strong standards of food safety, speed, and customer service.

KFC (2020-2023)

Assistant Manager

Managed shifts and staff performance in a high-volume store, handling cash reconciliation, inventory control, and customer issues while meeting sales and service targets.

Educational History

Bachelor of Computer and Information Sciences (2020 - 2023)

Major in Software Development. Minor in Data Science and Artificial Intelligence. I learned to build software from end to end, from designing features through to delivering them. I'm comfortable moving between coding languages to suit what each project needs, and I focus on shipping safe code that follows proper guidelines. My studies also covered designing data storage and fast query systems, and building AI models that turn data into useful outcomes.

About

Software Engineer with 6+ years of team leadership experience. Bringing a mix of technical ability and real-world management skills to a full-time engineering role.
NZ Citizen with full Australian working rights.

Skills

Full-Stack Development

- React & Next.js
- TypeScript & HTML & CSS
- Tailwind & Node.js
- Express & Rest API
- GraphQL & Auth

Cloud Dev Ops

- Azure & AWS
- Github & Kubernetes

Database & Data

- Postgre SQL & MongoDB
- Redis & Prisma
- MySQL

Artificial Intelligence

- LLM API & RAG
- Prompt Design
- PyTorch & pandas
- Vector Search

Languages

- Python & JavaScript
- Typescript & Java
- C & C++ & C#
- Go & SQL & Bash
